This modification obligates \$31,972.05 in FY2002 funds

All other terms and conditions remain the same.

STATEMENT OF WORK
FOR
MODIFICATION NO. 4 TO CONTRACT NO. NRC-04-01-051

I. TITLE Sewage Sludge Data Reports Preparation

II. BACKGROUND

In 1994, the General Accounting Office (GAO) recommended that NRC determine the extent to which radioactive contamination of sewage sludge and ash is occurring and establish acceptable limits for radioactivity in sludge and ash in order to ensure the health and safety of treatment workers and the public. NRC collaborated with the Environmental Protection Agency (EPA) to conduct a radioanalytical survey of sludge and ash from Publicly Owned Treatment Works (POTWs). Early in 1998, questionnaires were mailed to about 600 POTWs. From their replies, approximately 300 POTWs were requested to send their sludge samples to one of two EPA approved laboratories for analysis. NRC contracted with Environmental Health Associates (EHA) to maintain and develop a database. The laboratories sent the results of the radiological analysis to EHA; in addition to this, the NRC obtained NRC and Agreement State licensees' names and addresses and provided that information to EHA for inclusion in the database.

III. SCOPE OF WORK

In connection with the performance of work under this project, information including that of proprietary nature was furnished by the POTWs to EHA through their responses to the questionnaire and the survey. The identity of the POTWs participating in the survey, the information provided by the POTWs in the questionnaires and the results of the radioanalysis of the sewage samples from the POTWs are considered privileged and are exempt from public inspection or disclosure. The use of proprietary information in reports prepared by EHA requires protection specified in NRC Management Directive 12.6, "NRC Sensitive Unclassified Information Security Program".

There are four tasks to be performed under this project:

Task 1: From the database, develop a list of licensees discharging to the collection systems of each of the POTWs that participated in the survey. Provide POTWs with list of licensees in their service area.

Task 2: Prepare a report for each POTWs that includes the results of the radioanalysis of their samples. The results will be summarized as a function of radionuclide, sample type, POTW process(es), licensee type and geographic location. This information is proprietary.

Task 3. Provide draft licensee lists and data reports to the project manager for review. After review and approval of the drafts by the NRC Project Manager, perform Task 4.

Task 4: Mail the radioanalysis survey report with a transmittal memo from the NRC to the POTWs.

IV. NRC Furnished Materials

The NRC will furnish copies of the appropriate cover memos transmitting the radioanalysis survey report to the POTWs.

V. REPORTING REQUIREMENTS

Monthly, the contractor shall submit a brief letter status report which summarizes the work completed and the expenditure of NRC funds. This report shall address the following categories: (1) staff effort; (2) travel; (3) equipment and supplies; and (4) other costs. Each report shall include by category: (a) costs of the previous month; (b) cumulative costs and uncosted obligations to date; and (c) projections by month for the remainder of the NRC obligated funds. The first monthly report shall provide the initial projections and subsequent reports shall either indicate revised projections or indicate "no change in the cost and uncosted expenditure projection." Two copies of this report shall be submitted to the NRC Project Manager, Ms. Andrea R. Jones. This report is due on the 20th day of the month following the month reported.

VI. DELIVERABLES AND SCHEDULE

Products from Tasks 1 and 2 without POTW identifiers are due via e-mail to the NRC Project Manager and as needed by the Sewage Sludge Subcommittee the day before its monthly meetings.

VII. MEETINGS AND TRAVEL

No travel is envisioned. If travel is required, it must be pre-approved by the NRC Project Manager.

VIII. PERIOD OF PERFORMANCE

The period of performance is for 4 months from the award date of this modification.

IX. TECHNICAL DIRECTION

Technical direction for this modification will be given by Andrea R. Jones, the Project Manager. She can be reached at 301-415-6231.
